FENTANYL

Before you begin to watch the segments in Module 1, complete the first two columns of the table below (What you know and what you want to know) about Fentanyl. Please ensure that you write at least 5 points for each column.

What I know

What I want to know

What I learned

VOCABULARY EXERCISE

Match the word with the meaning.

COCAINE

PSYCHOSIS

FENTANYL

HEART ATTACK

HEROIN

CRYSTAL METH

Is a powerfully addictive stimulant drug made from the leaves of the coca plant native to South America. Although healthcare providers can use it for valid medical purposes such as local anesthesia for some surgeries, possession of more than 2.5 grams of cocaine is illegal. As a street drug, cocaine looks like a white crystal powder. Street dealers often bulk it up with additives like cornstarch, talcum powder, or flour to increase profits. They may also combine it with other drugs (often with fentanyl).

Is the failure of the pumping action of the heart, resulting in loss of consciousness, and later an absence of - breathing and pulse: a medical emergency requiring immediate resuscitative treatment, if possible.

Is a synthetic opiate drug which is a powerful painkiller and tranquillizer. It is found in 80% of all street drugs.

Is a concentrated and highly potent methamphetamine with dangerous side effects. It is used medically in the form of crystalline hydrochloride, but it is often used illicitly.

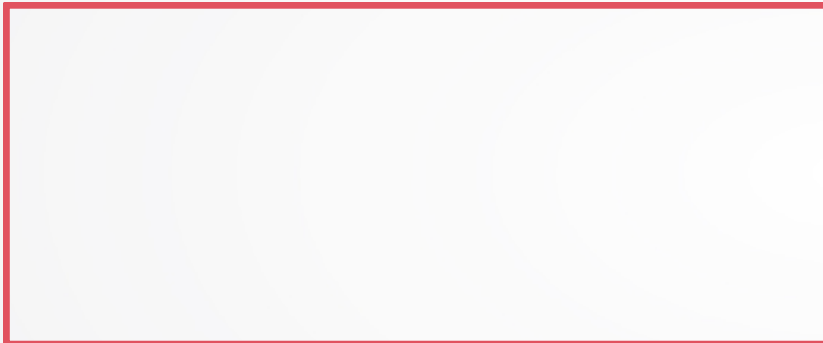

Is a severe mental disorder in which thoughts and emotions are so impaired that contact is lost with external reality.

Is a white, odourless, bitter, highly addictive narcotic crystalline compound that is derived from morphine.

ECSTASY

MDMA

ODD SQUAD

CARFENTANIL

It is a registered not-for-profit charitable organization created in 1997 by seven Vancouver City Police Officers to empower youth to make positive life choices about drug use and criminal behaviour through educational material and documentaries.

It is a time of intense difficulty or danger.

It is a pure, potent form of heroin originating in Southeast Asia.

The chemical 3,4-methylenedioxy-methamphetamine (MDMA) is a synthetic drug that alters mood and perception (awareness of surrounding objects and conditions). It is chemically similar to both stimulants and hallucinogens, producing feelings of increased energy, pleasure, emotional warmth, and distorted sensory and time perception.

It is a synthetic amphetamine used illicitly for its mood-enhancing and hallucinogenic properties.

This large-animal veterinary drug is an ultra-potent synthetic opioid that is up to 100 times more potent than fentanyl and is not approved for use in humans in any capacity.

Something I still Wonder about:

VOCABULARY EXERCISE

Match the word with the meaning.

BENZODIAZEPINES

NARCAN

CANNABINOIDS

NALOXONE

PSYCHOACTIVE DRUG

XYLAZINE

HALLUCINOGENS

A type of medication known as tranquillizers include Valium and Xanax. They are some of the most commonly prescribed medications in the United States. When people without prescriptions obtain and take these drugs for their sedating effects, use turns into abuse.

A non-opioid veterinary tranquillizer, not approved for human use, has been linked to an increasing number of overdose deaths nationwide in the evolving drug addiction and overdose crisis.¹ Studies show people exposed to it often knowingly or unknowingly used it in combination with other drugs, particularly illicit fentanyl.

A diverse drug group that alters perception (awareness of surrounding objects and conditions), thoughts, and feelings. They cause hallucinations, or sensations and images that seem real though they are not.

A chemical substance that acts primarily upon the central nervous system where it alters brain function, resulting in temporary changes in perception, mood, consciousness, and behaviour.

Any of the various chemical constituents (such as THC or cannabinal) of cannabis or marijuana.

This is synonymous with Narcan.

A medication that blocks the effects of opioids (such as heroin, morphine, fentanyl, etc.) that can be used to temporarily reverse an opioid overdose.

MELANIE JORGENSEN

Question for students:

Who is at risk? I believe everyone is at risk. Drugs are indiscriminate. It doesn't matter if you are rich or poor, female or male; it will affect anyone. Drugs are an equal opportunity destroyer. I do believe that it is important to be connected, to have a sense of belonging.

Q.1 Do you agree? Why/why not?

Q.2 Why do you think she believes that everyone is at risk?

Q.3 Do you think it is important for young people to avoid using drugs? Why/why not?

Q.4 What do you think “being connected” means?

DOUG ROGERS

The literature is very clear that the younger a child starts (using drugs), the more likelihood they are going to have a problem as they get older.

~ Doug Rogers, Substance Abuse Prevention Counsellor

Do you agree with the statement? Why or why not?

What ages do you think Doug Rogers is referring to? What makes you believe that?

What drugs do you think are being referred to in the quote? Why do you believe that?

Does the type of drug matter? Why or why not?

BILL MACEWAN AND DOUG ROGERS

“People are coming to drugs because they are available, they are cheap, and they have got friends or social connections going, hey, let’s just try it, let’s see how it goes.”

~ Dr. Bill MacEwan

List why you either agree or disagree with Dr. Bill MacEwan's statement about people trying drugs

“Drugs are easy to get.” Explain

“Drugs are cheap.” Explain

“Peer Pressure can have a negative effect in using drugs.” Explain

JANICE WALKER

"I remember Joe saying that everybody tells you all the things that are scary and bad about drugs, but nobody tells you how much fun they actually are... that's the sickest part because you do them and you think how can they be bad...but by the time you realize they are bad, it's too late."

Janice Walker – Joe's mom

How could Joe's quote help others who are considering experimenting with drugs?

What information do you think is necessary to share with students about drugs?

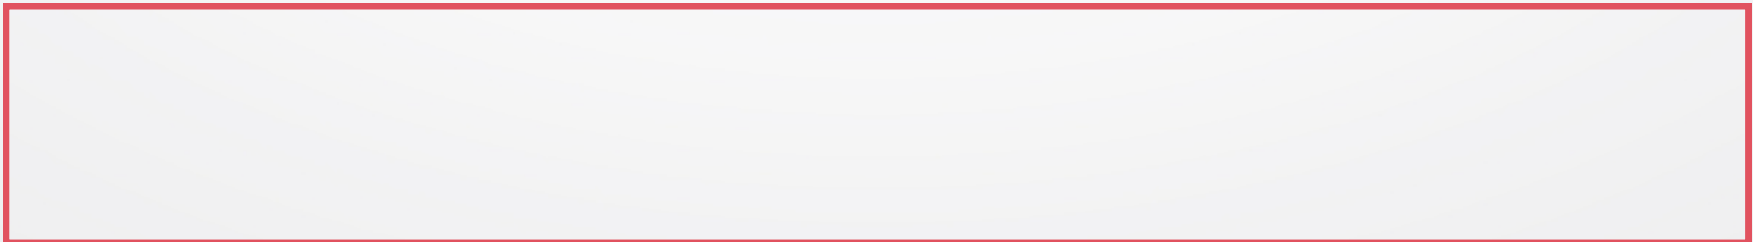

What do you learn about Joe from his quote?

POEM

Create a poem or drawing from the words and phrases of Mark Bodie's statement below.

"If I were able to meet the person and have a talk with the person that sold the pill to my son, I would hope that I would have time to talk to him about who Jack was, that he was this phenomenal young man with so much potential that we miss so dearly, we miss his hugs, we miss his love. We miss hearing what he's been doing. And I would tell that to that guy. And I would show him my family, and I would show him my family at times where we're shattered, where we're curled up on the floor crying. I would show him the kid down the street who is his youthful best friend who is in a deep depression. I would show him the young woman that was a friend who overdosed twice in a week as a result of the drugs. I would show him the shattered lives that are going to continue month after month after Jack's death. It's been a multiplier effect. There are a lot of people hurting out there as a result of it. I'd show him that. And then I'd show him compassion, and I'd show him love and forgiveness. And I hope that we can show him a better way to life than one destroyed by drugs."

Mark Bodie – Jack's father

THOUGHTS

Write your thoughts on each of the points:

Why is honesty crucial to recovery?

What does Melanie mean by Culture is healing?

How would you support a friend [getting into recovery, or during recovery]?

What stood out for you when Roberta talked about her recovery?

CHIEF PALMER

Chief Palmer talks about proper education and prevention to stop people from getting on drugs.

What examples do you know that show drug use is harmless?

What consequences can you name for using drugs, especially as a young adult?

What would make you not want to use drugs?

KNOWLEDGE CHECK

Something I learned:

Something I still Wonder about:

FINAL ASSESSMENT-1

Have you heard about the drug fentanyl before?

Do you know anyone who has used fentanyl or other drugs? What kinds?

How do you think fentanyl affects the body and the brain? What part of your body can you do without?

Are you aware of the potential consequences of fentanyl use, such as addiction and overdose?

Have you ever been pressured by peers to try drugs? How did you respond?

What sources do you rely on for information about drugs and their risks?

FINAL ASSESSMENT-2

How do you make decisions about your health and well-being?

How confident do you feel in your ability to resist peer pressure to use drugs?

Do you think education and awareness campaigns about fentanyl and other drugs could help reduce drug use and addiction among young people? Why or why not?

It is clear that pregnant women should not be ingesting toxins like alcohol, tobacco, or non-prescription drugs because it will hurt the baby in the womb. Your brain which does not fully mature until your mid-twenties. How will drug use affect this “baby brain”?

What note could you leave behind for your family to read should you accidentally get fentanyl in your “recreational” drugs?

FINAL ASSESSMENT-3

What does “drug roulette” refer to? Is this a game worth playing? How can the dosage and purity of a drug change from dealer to dealer?

Can you tell what chemicals are in a drug, or the strength of the drug, merely by looking at it?
