

Fentanyl series teachers' answer key for the vocabulary exercise

Module 1 - Sequence 1 - Vocabulary Exercise

Match terms with correct descriptions.

COCAINE

is a powerfully addictive stimulant drug made from the leaves of the coca plant native to South America. As a street drug, cocaine looks like a fine, white, crystal powder. Street dealers often mix it with things like cornstarch, talcum powder, or flour to increase profits. They may also mix it with other drugs like Fentanyl.

HEART ATTACK

failure of the pumping action of the heart, resulting in loss of consciousness and absence of pulse and breathing: a medical emergency requiring immediate resuscitative treatment

FENTANYL

a synthetic opiate drug which is a powerful painkiller and tranquilizer

CRYSTAL METH

a concentrated and highly potent methamphetamine with dangerous side effects used medically in the form of crystalline hydrochloride and often used illicitly

PSYCHOSIS

a severe mental disorder in which thoughts and emotions are so impaired that contact is lost with external reality

HEROIN

a white, odourless, bitter crystalline compound that is derived from morphine and is a highly addictive narcotic

Module 1 - Sequence 2 - Vocabulary Exercise

Addiction

the condition of being habitually or compulsively occupied with or involved in something and continuing its use despite negative consequences

Opiates

Prescription opioids are medications primarily used to treat acute and chronic pain

Detox

a treatment that is intended to remove poisonous or harmful substances from your body

Oxy

short for oxycodone; a synthetic analgesic drug that is similar to morphine in its effects and subject to abuse and addiction

Module 1 - Sequence 3 - Vocabulary Exercise
